

module 4 final project

ASAD RAHMAN

PROJECT AIMS

Increase efficiency in Pneumonia detection in X-rays

METHODOLOGY

DATASET: 5,863 X-Rays

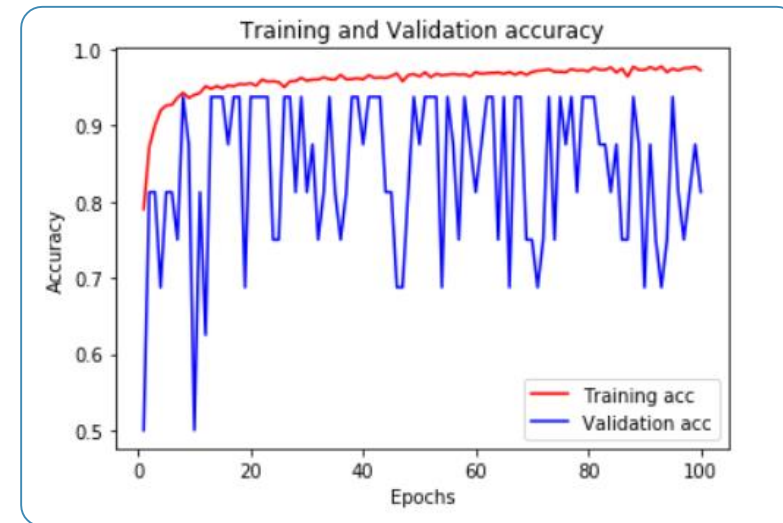

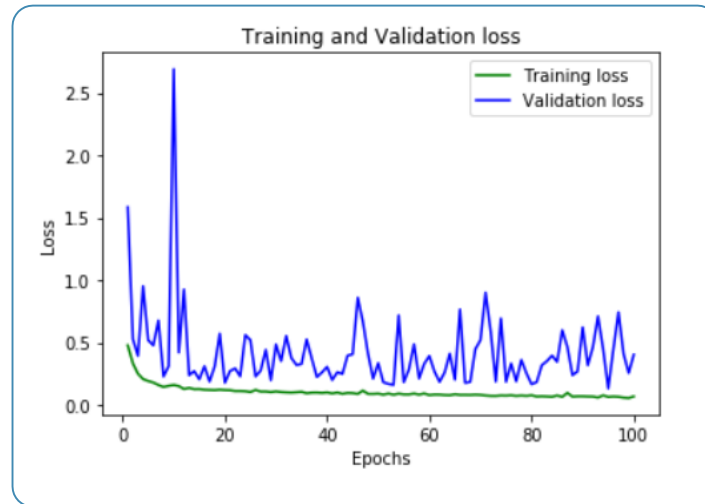

CREATE and TEST MODEL

IMPROVE MODEL with
OPTIMIZATION

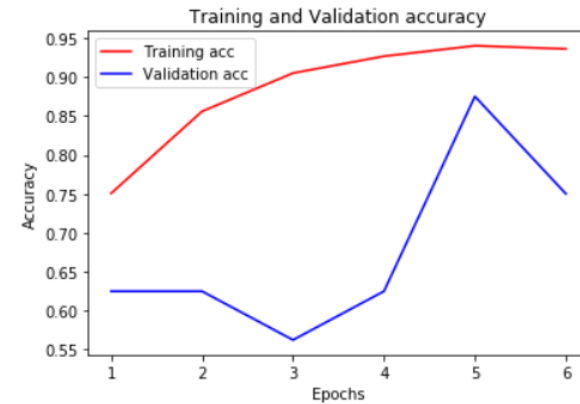

BASELINE MODEL

- Base Keras model obtained 98% accuracy on training images
- Only 74% accuracy on testing images

Convolutional Neural Network

- Training image accuracy 90%
- Testing image accuracy 80%

Future Recommendations

OPTIMIZE NEURAL
NETWORK

INCREASE TESTING
TIME

INCREASE TESTING
DATA SET

Thank You
